IELTS Up Words!

LESSON 2-Siblings

Hello, and welcome to the second lesson of IELTS Up Words!

You are soon going to embark on a wonderful journey—a journey of learning beautiful structures! What? You don't know the meaning of embarking? No worries, my friend. I always explain the meaning of important vocabulary and structures in each lesson. I usually explain them at the end of each lesson, so every time you hear a strange word, first, do your best to guess its meaning, and then, wait for my explanation to see if your guess was correct.

Now, let's start with the first part of the lesson. I usually start each lesson by talking about the topic and using topic-related vocabulary in a suitable context. So, are you ready for the first topic? It is about siblings—brothers and sisters. The first lessons are relatively short and easy so that you can get comfortable with the format of the course, and of course, with my voice. Haha.

Siblings

Now without further ado, let's get to the first lesson. I am going to talk a bit about myself and my family.

My name is Yasaman, but everyone calls me Yasi, which is great because I love this nickname so much! I used to live with my family, I mean my immediate family, but now I live alone. Living with my family was not the easiest thing to do because I had a hard time getting on with my siblings. I have two adolescent sisters who are a few years my junior, and I guess I have failed to establish a close connection with them. The thing is, we grew up with lots of sibling rivalry, so we never got to develop a loving relationship. However, I haven't given up on our relationship yet. I intend to build it and, ultimately, turn it into something beautiful that endures throughout our lives.

Now, we are going to go through each important word and learn more about them.

"Speaking Tip" is another part of each lesson in this course. In this section, I give you some tips on how to improve your IELTS speaking or speaking in general. The points are summarized in bullet points in your PDF file, so for their full explanation, make sure to check out the audio files.

Speaking Tip

- Topic-related vocabulary refers to the words and expressions related to the topic of discussion.
- Use topic related vocabulary to improve your score.
- For example, "conjugal" is related to the topic of relationships and improves your score if you use it correctly.
- Do not use slangs.
- Proper idioms also count as topic-related vocabulary.

How did you like this lesson so far? We usually leave the last part of each lesson for a revision of what we have learned, and I might ask you some questions from the previous lessons. Never skip this part because it shows how well you have learned the previous lessons. If you answer the questions correctly, it means that you are ready to start the next one.

If you listen to what I say and follow my tips, I promise that your speaking and level of English will improve a lot.

But why should you listen to me anyway? Why should you trust me? Well, I took IELTS preparation courses sixteen years ago myself and then studied English literature at Allameh Tabataba'i University, and after that, I taught English for over seven years. I have tutored many individuals online and have held IELTS classes as well. I have also sat the IELTS test many times, both inside and outside the country, and my last two scores for the Speaking section of the test were 9 and 8.5. The last exam that I took was in February 2020 at IRSAFAM and my overall score was 8.5. Add to that the fact that I have more than ten years of experience in online course creation and have created other widely successful courses, such as 504 Essential Words and Travel Collection that are accessible via Lingemy.com. So, I know what exactly you need to do to score high in IELTS with the help of this online course.

topic-related words and structures	meaning	translation	other structures
sibling (noun)	a brother or sister	خواهر یا برادر	stepbrother; stepsister; stepmom; half brother
