Lesson 20: Space Travel

Space Travel

Welcome to lesson twenty of IELTS Up Words! If you are into science-fiction movies, then you are in for a treat in this lesson because it is all about space travel! To me, space travel or anything related to the cosmos is fascinating. And, obviously, with the speed at which technology is developing these days, it is not going to be long before we all get to travel into space or even move to another planet, don't you agree?

In this lesson, I have an easy question for you—about whether or not you would like to travel to outer space. But before we get to the question, I would like to teach you some beautiful nouns and adjectives related to space travel.
