IELTS Up Words!

Lesson 23: Architecture

Architecture

Hello, and welcome to lesson twenty-three of IELTS Up Words! I am Yasi, your IELTS mentor from Lingemy.com, and I am here to help you learn the vocabulary you need to slay this test! Haha! Don't use "slay" in this test, though, because it is informal! It is okay to use informal language in the speaking section of IELTS, but only to some extent. You want to show off your knowledge, so using too much informal language will work to your disadvantage. However, don't use too many low-frequency words either since you should speak as naturally as possible. Now you might ask how you should find the balance. Well, the only way is to expose yourself to the language as much as possible. Watch a lot of movies, TED Talks, listen to podcasts, and read books to find that balance little by little because, remember, it won't happen overnight.

In this lesson, I am going to talk about my favorite style of architecture and use lots of new words. It is OK if you don't understand every word that I say, but try to get the gist of what I am saying—its main points. Then, it will be your turn to talk about your favorite style or styles.

I like many different styles of architecture, but my favorite is probably minimalist architecture. The exterior of buildings designed in this style generally looks symmetrical, with the repetition of elements to give a sense of order and unification. Minimalist architecture favors plain designs over ornate ones, which I find quite comforting.

Minimalist architecture—sometimes referred to as minimalism—involves the use of simple design elements, without decoration. The facade is often structured with pure geometric forms created from straight lines and the focus is on creating open spaces, a feature that, again, guarantees a sense of calm.

This type of architecture finds its roots mostly in Japanese culture and often aims to bring together nature and the interior to achieve a balance between the man-made architecture and the environment.

Speaking Tip

Collocations

- Collocations are combinations of words which are usually used together.
- Learning collocations will make your English sounds more natural.
- Using the wrong sets of words together sounds strange and unnatural.
- There is usually no rule when it comes to learning most collocations.
- You can find collocations in the example sentences in dictionaries or websites such as ozdic.com.
