IELTS Up Words!

Lesson 29: Urbanization

Hello, and welcome to lesson twenty-nine! I am Yasi from Lingemy.com. How are you today? Feeling great? Perfect! Now let's get straight to today's lesson, which is about urbanization. But wait? What is it exactly? Well, you know the meaning of urban, which means related to the city, and then we add the suffix -ization, meaning "formation." So, this word has something to do with the process of making a place more urban. See? You can guess the meaning of many words by simply analyzing their suffixes, prefixes, and roots.

Cambridge dictionary defines urbanization as "the process by which more and more people leave the countryside to live in the cities." This is similar to what I mentioned in the previous lesson. I said that a lot of people migrate from rural areas to the city in the hope of a better life.

This migration alongside other factors have contributed to an increase in the growth of population in urban areas. Such a staggering rate of urbanization brings its own problems. I mean, cities are becoming larger with more people living there which means that there will be more problems to deal with. For instance, poverty will increase and living spaces become more cramped.

These problems should be addressed soon, or the results will be catastrophic.

Now for the final part of this lesson, I am going to pose a question related to urbanization and the growth in cities. But this time, I am not going to answer it myself. You will hear a part of a TED-Ed as the answer to this question. A TED-Ed is an educational video, created by TED. You can find lots of TED-Ed videos on Youtube, or on the Internet. Ready?

So how do cities need to change to accommodate this growth?

First, the world will need to seek ways to provide adequate food, sanitation, and education for all people. Second, growth will need to happen in a way that does not damage the land that provides us with the goods and services that support the human population. Food production might move to vertical farms in skyscrapers, rooftop gardens, or vacant lots in city centers, while power will increasingly come from multiple sources of renewable energy. Instead of single-family homes, more residences will be built vertically. We may see buildings that contain everything that people need for their daily life as well as smaller, self-sufficient cities focused on local and sustainable production. The future of cities is diverse, malleable, and creative—no longer built around a single industry, but reflecting an increasingly connected and global world.

Speaking Tip

Speaking Part Two Note-Taking Technique

For speaking part two, you will be given one minute to take notes, before answering the question.

Note-taking helps organize your thoughts and, therefore, your talk.

By making notes about a question, you are more likely to come up with more ideas.

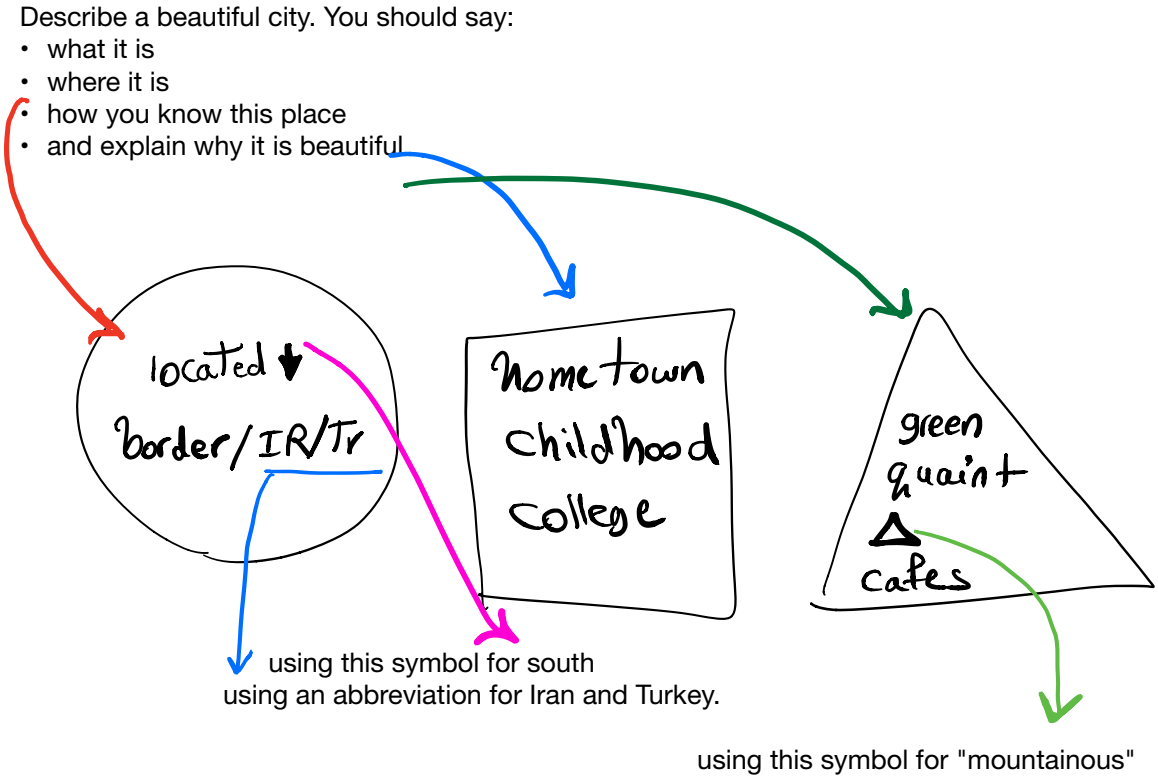

Do not write down full sentences. Only write keywords.

Use a lot of abbreviations, acronyms, and symbols.

Draw a big circle for the first part of the notes, a square for the second part, and a triangle for the third part. Take notes inside these shapes so that you won't mix up your notes and would know where to look while speaking.

Do not use more than one or two abbreviations, or you will confuse them.

Remember, practice makes perfect.

topic-related words and structures	meaning	translation	other structures
urbanization	becoming more like a city; the population shift from the rural areas to urban areas	شهرنشینی	urbanism; urban development
a staggering rate of urbanization	an astonishing and shocking rate of urbanization	نرخ حیرت‌انگیز (و عجیب) شهرسازی	synonym (staggering): mind-blowing; surprising
to deal with a problem	to take action to solve a problem	به یک مشکل رسیدگی کردن	to tackle a problem to address a problem to present a problem to identify a problem
catastrophic results	outcomes involving or causing sudden great damage or suffering	نتایج فاجعه‌بار	disastrous; tragic; dire
poverty	the state of being extremely poor	فقر؛تنگدستی	eradicate/combat/ eliminate poverty; living in poverty; below the poverty line
to accommodate this growth	to adapt to this growth	وفق‌دادن با این رشد	synonym: adjust; accustom
sanitation	the systems for taking dirty water and other waste products away from buildings in order to protect people's health	سیستم آب و فاضلاب	Sanitize sanitization sanitary
vertical farms in skyscrapers	crops grown in vertical layers in tall buildings	مزارع عمودی در آسمان‌خراش‌ها	

topic-related words and structures	meaning	translation	other structures
rooftop gardens	a garden on the roof of a building, providing food and recreational opportunities	باغ پشت‌بامی؛ بام‌باغ	
vacant lots	a small area of land in a city or town that is not occupied or not being used	قطعه‌زمین‌های آزاد/ اشغال‌نشده	synonym: wasteland; undeveloped land
renewable energy	energy made from resources that nature will replace, like wind, water, and sunshine	انرژی تجدیدپذیر	solar energy
residence	a home; a place, especially a house, in which a person lives or resides	محل اقامت؛ سکونتگاه	resident (noun)
self-sufficient cities	cities that need no outside help in satisfying their basic needs	شهرهای خودکفا/ خوداستوار	synonym: self-supporting; self-reliant; independent
diverse	showing a great deal of variety; very different	متنوع	Diversity diversified
malleable	adaptable; easily influenced	سازش‌پذیر؛ انعطاف‌پذیر	susceptible

other words/ structures	meaning	translation	other structures
suffix	a letter or group of letters added at the end of a word to make a new word	پسوند	affix
prefix	a letter or group of letters added to the beginning of a word to make a new word	پیشوند	affix
alongside	together with	در کنار	next to
practice makes perfect	used to say that people become better at something if they do it often	با تمرین کردن بهتر می‌شوی؛ معادل ضرب‌المثل «کار نیکو کردن از پر کردن است»
