IELTS Up Words!

Lesson 45: Change

Hello there again! Ready for lesson forty-five of IELTS Up Words? Then, let's dive in!

Let's talk about change and answer the following questions which are sample part 3 questions. They are more complicated than part one questions, and you need to speak at length using advanced vocabulary if possible.

How different is life today compared to when your grandparents were young?

Well, I think life is vastly different compared to that time. First, family life has gone through dramatic changes in the last thirty years. This is because of a decrease in marriage rates and an increase in divorce rates, plus a rise in the number of children growing up in single-parent families. Second, there has been a gradual movement in favor of surveillance, resulting in an invasion of privacy. And finally, people's health has deteriorated due to leading an unhealthy lifestyle.

What changes do you think we will see in the next twenty years?

I believe we will experience sweeping changes in the next twenty years. First and foremost, today's jobs will be a thing of the past. This will happen with the replacement of humans with artificial intelligence, which means that robots will start doing most of our work in the decades to come. Secondly, our lifespan will extend dramatically, thanks to the advances in medicine and technological discoveries. And finally, transport systems will undergo a transformation and make travel far easier. For example, we will probably have trains that run extremely fast and more comfortable airplanes.

Speaking Tip

The Listing Technique for Part 3

We answered the above questions using a technique called listing. When answering a part three question, you can organize your ideas by listing them. The listing technique is as follows:

1- introduction

2- first/firstly/first and foremost/etc.

3- an example, explanation, or result

4- repeat
