IELTS Up Words!

Lesson 48: Science

Hello, this is lesson forty-eight of IELTS Up Words. I am Yasi, your IELTS mentor, and your friend. I mean, we have become friends, haven't we? After all these lessons together, you must be seriously considering the idea of including me in your circle of friends, right? Haha!

In this lesson, we are going to learn a bit more about science. I don't know about you, but science was my favorite subject back in high school. So, what do you know about it? Well, I think you already know that people who conduct scientific research to advance knowledge are called scientists. And you probably know that science has different branches, such as physical science, Earth science, and life science.

Physical science comprises of physics and chemistry—two widely useful fields in today's world. What do you know about chemistry? Do you remember anything about compounds and catalysts? Did you know that pharmaceuticals are mainly based on them? I mean, the medication that we take to cure our ailments are usually a product of chemical reactions. A lot of household items are also chemical products, such as bleach, drain cleaners, and air fresheners. I am sure you also know that chemicals can be quite harmful to us and the environment, as they contaminate water and cause chronic or terminal illnesses.

Chemistry has given rise to the use of anything synthetic. Just look at the widespread use of plastic everywhere. I think we should put an end to it, though. In terms of medicine, natural remedies are always better, and in terms of food, anything organic is superior to GM foods.

Overall, it is extremely important to stay away from chemicals and modified food as much as possible because it is highly probable that these synthesized substances work to our disadvantage in the long run.

Now that I have exposed you to so many new words and expressions, it is time to put them to use and answer the following questions. Answer the following questions to the best of your ability, okay? Ready?

1. Do you think we are too dependent on chemicals nowadays?

2. Have chemicals improved our lives or made it more dangerous?

Speaking Tip

Extreme Adjectives

Extreme adjectives are words that give extra emphasis to the subject they describe.

For example, “funny” is a normal adjective, expressing that something makes us laugh, but “hilarious” is an extreme adjective, which shows that something makes us laugh a lot.

We do not use “very” before an extreme adjective: very hilarious

We can use adverbs like “highly,” “absolutely,” and “extremely” to describe an extreme adjective.

Below you can find a list of adjectives and the adverbs they collocate with.

highly	absolutely	extremely
probable	essential	probable
skilled	terrible	anxious
valued	necessary	addictive
addictive	crucial	controversial
unusual	useless	disappointing
recommended	vital	overweight
educated	awful	difficult

topic-related words and structures	meaning	translation	other structures
conduct scientific research	organize and research to contribute toward science	انجام تحقیق علمی	carry out a research/ experiment
to advance knowledge	to progress and gain more knowledge	پیشرفت‌کردن در علم؛ پیشبرد دانسته‌ها	to make progress in something
compounds	a chemical that combines two or more elements	ترکیب‌ها (شیمی)	mixture; blend (noun) atoms; molecules
catalyst	something that makes a chemical reaction happen more quickly	کاتالیزور یا کاتالیزگر؛ ماده‌ای که پس از اضافه‌شدن به یک مخلوط شیمیایی، سرعت واکنش آن را افزایش می‌دهد	Catalysis synoynm: accelerator; stimulant
pharmaceuticals	compounds manufactured for use as medicinal drugs	داروها	pharmacist; pharmacy
to cure our ailments	to heal our illnesses (typically minor ones)	درمان بیماری‌های جزئی‌مان	ache; disease; disorder
chemical reaction	a chemical change that forms new substances	واکنش شیمیایی	chain reaction (=a chemical reaction in which each change causes another)
to contaminate water	to make water impure or make it poisonous	آلوده‌کردن آب	pollute; taint ;contamination
a chronic illness	an illness that persists for a long time or is constantly recurring	بیماری دیرینه؛ بیماری مز من	persistent; long-standing opposite: acute example: acute appendicitis

topic-related words and structures	meaning	translation	other structures
a terminal illness	an illness predicted to lead to death, especially slowly	بیماری کشنده؛ بیماری علاج ناپذیر	fatal; incurable; untreatable
synthetic	made from artificial substances, especially to imitate a natural product	تولیدشده از راه ترکیب شیمیایی؛ مرکب از مواد مصنوعی	synthesize
the widespread use of plastic	extensive and large-scale use of plastic	استفادهٔ گسترده / فراگیر پلاستیک	extensive; pervasive
natural remedy	a medicine made with ingredients available at home	داروی طبیعی / خانگی	homemade remedy; herbal remedy
organic	not using artificial chemicals in the growing of plants and animals for food and other products	طبیعی؛ ارگانیک	Natural opposite; inorganic
GM foods	genetically-modified foods; foods from crops whose genes have been scientifically changed	غذاهای اصلاح‌شدهٔ ژنتیکی	genetically engineered foods

other words/ structures	meaning	translation	other structures
household items	products used within households	وسایل خانگی	household goods ;laundry detergent; fabric softener; trash bags
bleach	a liquid or powder used to clean or make something whiter or lighter in color	سفیدکننده	whitener
drain cleaners	a chemical-based product that unblocks sewer pipes or helps to prevent the occurrence of clogged drains	بازکنندهٔ لوله‌ها	unclogging
to give rise to something	to make something happen or begin, especially something unpleasant	موجب پیدایش چیزی شدن؛ به‌وجودآوردن چیزی	bring about; bring on
to put an end to something	to make something stop happening or existing	پایان‌دادن به چیزی	to put a stop to something; to terminate something ;to abolish something
superior	better than average, or better than others of the same type	برتر؛ دارای ارجحیت	finer; better
highly probable	very likely	بسیار محتمل	
work to our disadvantage	to cause problems for us	به ضرر ما تمام خواهد شد؛ برای ما مشکل‌ساز خواهد شد	
in the long run	at a time that is far away in the future	در دراز مدت	in the end; eventually; ultimately
to expose someone to something	to show someone or something to someone or something	چیزی را به کسی نشان‌دادن ، در معرض قرارگرفتن	exposure
to put something to use	to apply or utilize something to suit a particular need or purpose	چیزی را به‌کارگرفتن	to make use of something; to take advantage of something
