IELTS Up Words!

Lesson 73: Water

Hello. You are listening to IELTS Up Words, lesson seventy-three! You must have consumed so much energy to be able to get this far! I mean you have used a lot of electricity to study all these lessons. Haha! But I hope it was all worth it. Almost everything these days requires some sort of energy, so I assume generating and conserving energy should be a priority for the governments. And since most societies still depend on fossil fuels as their main source of energy and fossil fuels are exhaustible resources, it is on all of us to find new sources of energy before it is too late.

It is not like we have to start from scratch, though. With the help of dams, wave turbines, and solar farms, most nations are already harnessing energy from the wind, the Sun, and water. However, there is a catch here because, as you see, to create all these structures, we need huge amounts of energy, which means we are caught in a vicious circle, as more fossil fuels are consumed.

The topic of water is another frequently asked subject that you should know about. Thus, let's go through a couple of questions around this topic.

Do you prefer a certain type of water?

Yes, I only drink lukewarm tap water when I am home and bottled water when I am out. I also make an effort to stay away from drinking cold or sparkling water because I have read somewhere that it is unhealthy.

Was transport by water more important in the past than it is nowadays?

Well, I am not quite sure, but I assume it was. It probably had to do with the fact that back then, ships provided the only way to cross a large body of water, like an ocean. This crossing played a crucial role in trade between countries, but it had its disadvantages, such as being time-consuming. On the other hand, even though water transport is not the fastest means of transportation, I believe it has remained a cheaper option compared to air travel, especially for long-haul routes. So, I would say that water transportation is probably not as important these days as it used to be a century ago, but it is still one of the most desirable modes of transport.

Speaking Tip

Buying Time

- When answering part-three questions, you can buy time using the following phrases.
- Part-three questions are quite tricky, so even native speakers would need to think before they answer those questions, which means that it is natural if you use the following phrases.
- Just like everything else that I have talked about so far, do not overuse them. Using them once or twice throughout the test is natural, but not more.
- Use them only when you truly need a little time to think or when you need to organize your thoughts.

"Well, that's an interesting question..."

"Well, I am not quite sure, but I would say that/assume that/it is probably because..."

"Oh, I am not sure. Let me think about that for a second."

"Mmm... that is a good question. I would say that transport by water is not as..."

topic-related words and structures	meaning	translation	other structures
to consume energy	to use energy	مصرف‌کردن انرژی	Consumption consumer
to generate energy	to produce energy or power	تولیدکردن انرژی	generator
to conserve energy	to use as little energy as possible so that it is not wasted	حفظ و نگهداری انرژی	energy conservation
exhaustible resources	supplies of energy that can be used completely so there are none left	منابع پایان‌پذیر	to exhaust something compared with recyclable resources
to harness energy	to change the energy into something we can use	مهارکردن انرژی	
lukewarm tap water	neither hot nor cold water that comes out of a tap (a device that controls the flow of water from a pipe) in a building such as a house or a hotel	آب ولرم شیر (لوله‌کشی)	tepid water; running water
sparkling water	water containing carbon dioxide	آب گازدار	carbonated water;
a body of water	the part of the Earth's surface covered with water (such as a river or lake or ocean)	پهنهٔ آبی	some examples of bodies of water: lake; gulf; reservoir; canal
water transport	the process of moving people, goods, etc. by boat, ship, or sailboat over a body of water	حمل‌ونقل از طریق راه‌های آبی	surface/air transport

other words/ structures	meaning	translation	other structures
to make it a priority	to care about one thing over all others	چیزی را در اولویت قراردادن	high priority to prioritize something
to start from scratch	to begin doing a job or activity completely from the beginning, with no source of aid	از صفر شروع کردن	to start from zero
there is a catch	there is a complication/ problem	مشکلی در بین است؛ پیچیدگی‌ای وجود دارد	
to be caught in a vicious circle	to be caught in a situation in which one problem causes another problem, that then makes the first problem even worse	گیرافتادن در یک دور باطل	to be trapped in a vicious circle
air travel	a form of travel in vehicles such as helicopters, airplanes, etc.	سفر هوایی	aviation
long-haul routes	routes (ways or courses) that cover a very long distance	مسیرهای طولانی	long-haul flight/ destination/etc. opposite: short-haul
